The first priority of my business is to be able to provide clients with high quality digital images. Technology has evolved to where we share our priceless images digitally rather than in print. My motivation for starting my business over 16 years ago was to provide high quality photography at a price that was practical and affordable. I could never see myself paying a photographer to take awesome images and then only being able to pick a couple of prints because of the prices. The issue that most professional photographers have with releasing digital files is that their images will be printed at low quality print labs which compromises the quality of the work. You will have the ability to print (for non-commercial purposes only) at a lab of your choice, but I ask you to please consider the quality. The bottom line is your prints will NOT look as good printed at a low quality lab. Unfortunately, I no longer recommend any local labs in Las Cruces. I recommend Mpix online for quality

prints that anyone can access. I use a professional print lab available only to professionals and the quality is awesome. I will gladly price prints and products for clients at discounted rates or you may order directly from your gallery. I provide clients with all of the digital files from their session with the convenience of downloading directly from the website. Your gallery will be delivered within 2 weeks after your session. Coats Creative Photography is the copyright owner and retains all rights, clients may print for personal, noncommercial purposes only. Business client may print and reproduce for general marketing
